ANIMAS / SAN JUAN

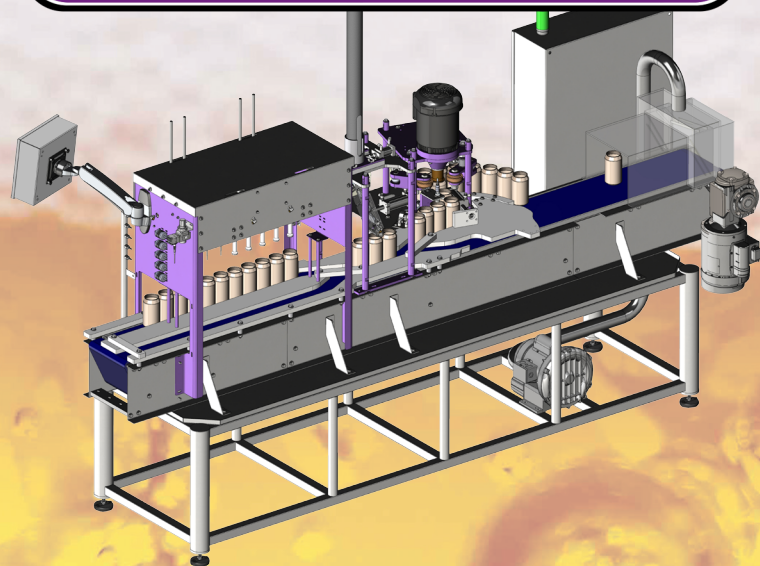

FULL-SIZED CANNING SYSTEMS

EQUIPPED WITH:

- ☐ Oxygen-reduction through pre-fill CO2 purge, precision foam control, fast times to seam, and CO2 Blanket Generator in Automated Lid Dispenser
- ☐ Precise volumetric flow metering controlling fill levels from the touch screen [operator can select timers instead of flow meters if desired]
- ☐ Generation 2 Industrial Seaming Stations
- ☐ Modern PLC machine controller with operator color touch screen allowing operator access to all critical timers, statistics, machine status, and machine control
- ☐ Fast changeover between can sizes
- ☐ Designed with ease of maintenance/repair in mind (even a monkey can fix it)
- ☐ World-class service and free seam checks with the Twin Monkeys seam inspection vision system
